😊 Creating Webapp

1. In this lab we will be creating webapp. For that write the script shown below and run it in your powershell.

```
14_webapp.ps1 ●
14_webapp.ps1 > ...
1    $resourceGroup="New-RG"
2    $location="North Europe"
3    $appServiceName="demoplan12541258"
4    $webAppName="webapp12365789451"
5
6    New-AzAppServicePlan -ResourceGroupName $resourceGroup -Location $location `
7    -Name $appServiceName -Tier "F1"
8
9    New-AzWebApp -ResourceGroupName $resourceGroup -Name $webAppName `
10   -Location $location -AppServicePlan $appServiceName
```

2. After some time you will your webapp in your Portal.

Name ↑↓	Type ↑↓	Location ↑↓	
demoplan12541258	App Service plan	North Europe	...
webapp12365789451	App Service	North Europe	...
